**LinkedIn:** <https://www.linkedin.com/in/anzalna-kainat-4973922b5/>

**Home:** (Pakistan)

## EDUCATION AND TRAINING

### Bachelor of Computer Science

*University of Sindh* [ 01/01/2020 – 01/02/2024 ]

City: Hyderabad

Country: Pakistan

Final grade: CGPA: 3.81/4.0

## LANGUAGE SKILLS

Mother tongue(s): **Urdu**

Other language(s): **English**

## PROJECTS

### EatTrek Restaurant Reservation Website - Front-End Development

Developed the front-end of the EatTrek Restaurant Reservation Website, translating UI/UX designs into responsive interfaces. Enabled table reservations, multilingual ordering, and meal pre-selection using HTML, CSS, and JavaScript.

### Virtual Scholar Online Learning Platform Website - Front-End Development

Developed front-end for Virtual Scholar Online Learning Platform, integrating diverse courses, resources, and a scholarship program. Used HTML, CSS, and JavaScript to create responsive interfaces from Adobe XD designs

### Bank Money Transfer Website - Front-End Development

Developed the front-end interface for bank money transfer website. Implemented user-friendly features and ensured intuitive navigation for seamless transactions. Utilized HTML, CSS, and JavaScript to create a responsive and secure platform for online banking.

### Virtual Scholar Online Learning Platform Responsive Website Design - UI / UX (Case Study)

[ 07/08/2023 – 04/09/2023 ]

Created Virtual Scholars to provide accessible education and career advancement opportunities. Features diverse courses, resources, and a scholarship program for inclusivity. Designed with Adobe XD, emphasizing user-centered design principles. Focused on fostering talent and promoting personal and career growth.

### EatTrek Restaurant Reservation Mobile App & Responsive Website Design - UI / UX (Case Study)

[ 15/06/2023 – 06/07/2023 ]

Created EatTrek, a restaurant app catering to busy individuals seeking streamlined dining experiences. Users can reserve tables, order in their preferred language, and pre-select meals for a hassle-free dining experience. Tailored for students and professionals. Designed using Figma (mobile) and AdobeXD (website), iteratively refining based on user feedback.

## HONOURS AND AWARDS

### Achievements

- Secured **100% merit-based scholarships** throughout the four years of my bachelors
- Awarded a scholarship from **IRM** for the online course of **Google UX Design on Coursera**.
- Received a scholarship from **HEC** for online courses of **Coursera**.

## CERTIFICATIONS

---

### MOOCs

- [\*\*Google UX Design - Specialization \(Coursera\)\*\*](#)

I have acquired a comprehensive understanding of user experience (UX) design principles and methodologies. I am proficient in empathizing with users, defining design problems, and generating innovative ideas through ideation. Furthermore, I have honed skills in building wireframes, low-fidelity prototypes, and conducting UX research to test early concepts iteratively. I am adept at creating high-fidelity designs and prototypes using Figma & AdobeXD, and proficient in designing user dynamic interfaces (UI) for websites.

- [\*\*Meta Front End Development - Specialization \(Coursera\)\*\*](#)

I gained comprehensive skills essential for front-end development. Mastering HTML, CSS, and JavaScript enabled me to build responsive and interactive web interfaces. Additionally, learning about version control and React equipped me to collaborate effectively and develop complex web applications using modern frameworks.

## ADDITIONAL INFORMATION

---

### Personal Skills

#### User Experience (UX) Design

- Proficient in empathizing with users, defining design problems, and generating innovative ideas.
- Skilled in building wireframes, prototypes, and conducting UX research iteratively.

#### User Interface (UI) Design

- Experienced in designing user-centric interfaces for websites and mobile applications.
- Proficient in Figma & AdobeXD.

#### Front-End Development

- Translates UI/UX designs into responsive web interfaces using HTML, CSS, and JavaScript.
  - Understanding of React for building user dynamic interfaces.
  - Proficient in Git for version control, facilitating collaborative development and effective management of code repositories.
-
